WEB DEVELOPMENT

Activity-Based Learning Report

Repository: WD-Activity-Based-Learning

Student Name	Md Zaheeruddin
Roll Number	26000179
Branch & Section	CSE-3
Report Date	24 October 2026

Purpose of the Report

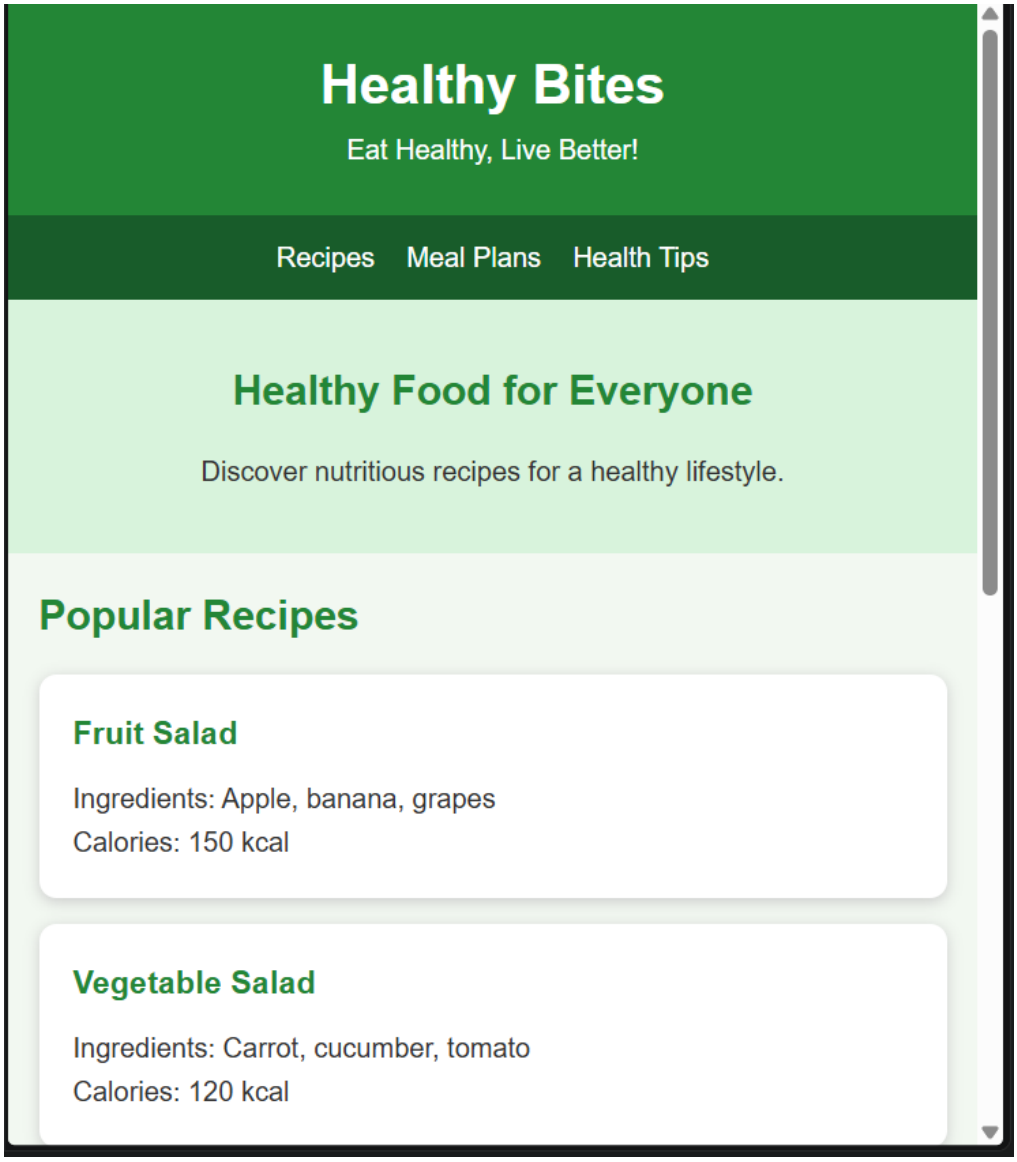

This report documents three web-development activities and includes screenshots of the rendered webpages. It summarizes each page's purpose, visible structure, and key design features for submission to the GitHub repository named above.

Activities Included

1. Healthy Bites – Healthy Food Website
2. Personal Portfolio Website
3. Fitzone Gym Website

Activity 1: Healthy Bites – Healthy Food Website

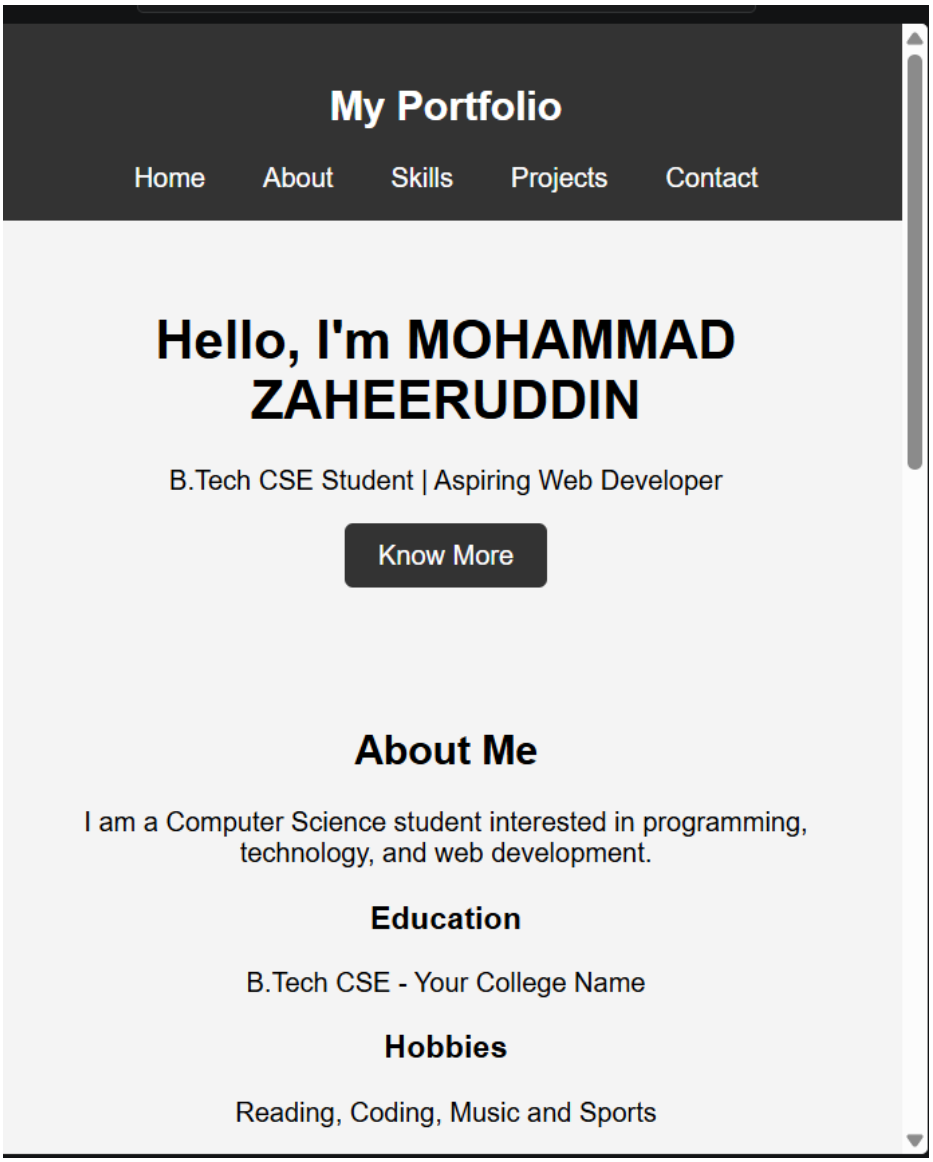

A healthy-food website concept that introduces nutritious eating and presents popular recipes with ingredients and calorie information. The layout uses a green color palette, a clear header, navigation links, a hero section, and recipe cards.

Key elements: site branding, navigation, introductory banner, recipe headings, ingredient details, and calorie labels.

Activity 2: Personal Portfolio Website

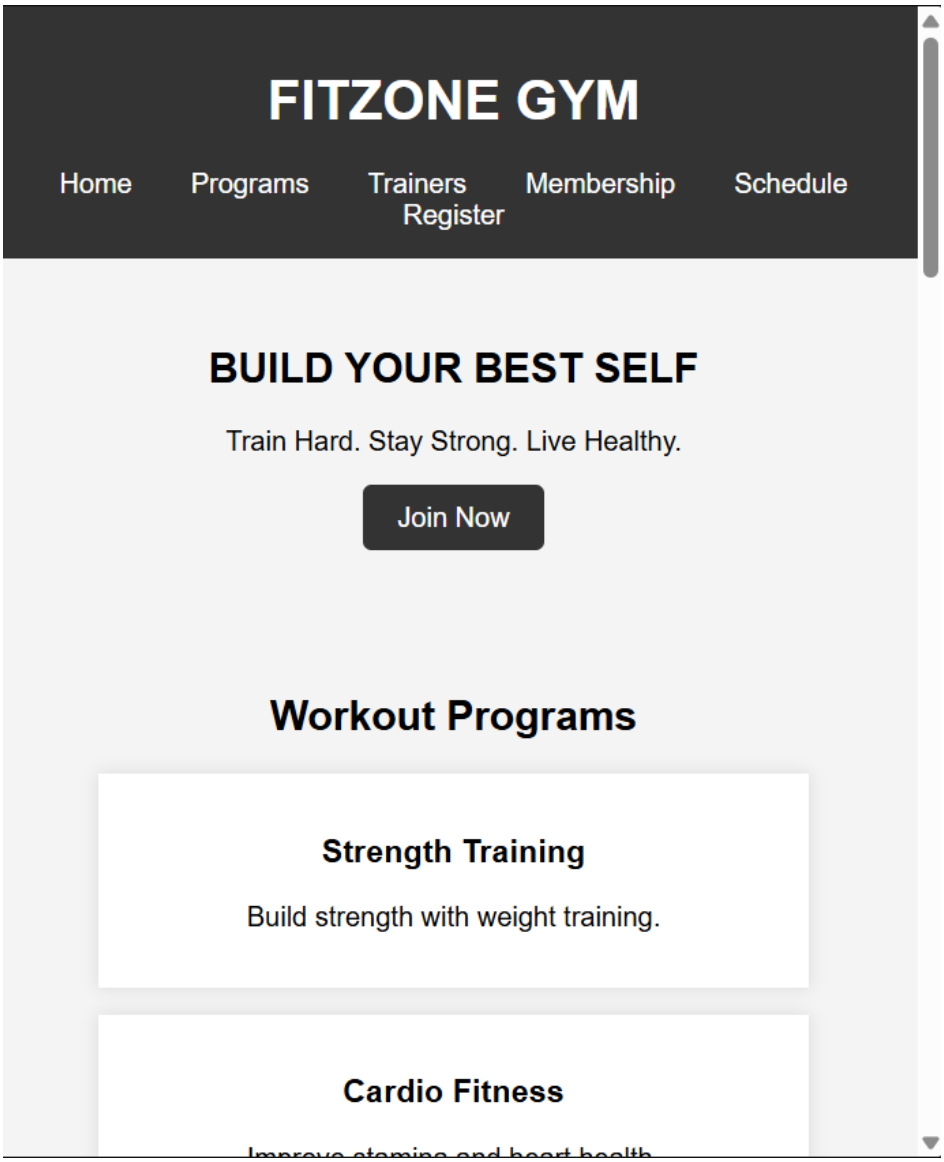

A personal portfolio webpage that introduces the student and provides navigation for Home, About, Skills, Projects, and Contact. The visible content includes a short introduction, education, and hobbies.

Key elements: personal introduction, navigation links, education section, and hobbies section.

Activity 3: Fitzone Gym Website

A fitness-center website concept featuring a bold gym title, navigation for programs, trainers, membership, and schedule, plus a call-to-action and workout program cards.

Key elements: gym branding, program navigation, call-to-action button, and workout-program cards.

Conclusion

These activities demonstrate basic webpage layout and content organization for different purposes: nutrition information, a student portfolio, and a fitness center. The screenshots provide visual evidence of the current rendered pages. For a stronger final submission, include the corresponding HTML/CSS source files in the repository alongside this report.
